Services

We assist with marketing support tasks such as:

- Copywriting
- Market Research
- Public & Community Relations
- Strategy & Planning
- Promotional Program Development
- Surveys

Inner City (IC) Green Program

Our IC Green Program assists non-profit and public agencies with promoting positive views of emerging inner-city communities.

We accomplish this by:

1. Conducting marketing and outreach efforts that will help to improve the reputation of emerging inner-city communities.
2. Encouraging beautiful, sustainable, green, healthy and prosperous communities by facilitating conscious living workshops and opportunities for self-actualization that may not have otherwise been targeted to these areas.
3. Transforming the public's perception of the economic opportunities that exist within the area by profiling positive, yet balanced, success stories of new and existing area businesses.
